

Bump Interlining

When you need to give your curtains a supremely opulent appearance, our Intermax Bump interlinings are the solution. Bump is available in a variety of weights and finishes that include pre-shrunk versions ideal for speeding up your curtain making process.

The stitched Web interlinings also help to reduce stretching and distortion and give your curtains added stability. The insulation properties of Intermax are a hidden bonus – this high quality interlining helps to keep out the cold and provide additional protection from sunlight.
