

Domestic Dimouts

venushome

Used as either a coloured lining or a single layer face Fabric, Venus Home is designed to reduce light in any domestic setting. Available in a wide choice of colours, this versatile range is produced from three layers of pre-dyed, coloured yarn; a black layer helps to create the

appropriate dimout quality. Textured polyester yarns are used to add extra body and create a fully washable face fabric while the coloured dye adds style and increases light fastness.
