

Domette Interlining

This traditional interlining is available in the widest variety of weights and finishes to help improve the draping qualities of your curtains. It adds extra weight and body to the lightest of curtain fabrics and is ideal for use with Roman Blinds to improve folding and reduce light entry.

Domette interlinings are often used with particularly high quality face fabrics like silks and taffetas to provide extra protection from the harmful effects of strong sunlight.

| Product Code | Product and Description | Composition | Construction Weight | Colours Ref. No. | Width | Average Roll Size | Available as | Notes |
