

Sarille Synthetic Interlining

Available in a variety of weights, Intermax synthetic linings are an economical choice that still boast a high level of stability. Made from selected, high grade polyester and viscose fleece, they are manufactured using a lockstitch process to create a material that resists shrinkage, distortion or stretching.

Product Code	Product and Description	Composition	Construction Weight	Colours	Width	Available as	Notes
6406	Synthetic Extra Heavy Weight Ideal for heavier fabrics using a combination of synthetic and natural fibres	Polyester/Viscose	250gm/sqm	White	137cm
